

Steel Push Eye Manual Trolley 10000 Lb. Capacity Orange

MODEL E-MT-10

Overhead Lifting / Low Profile Manual Trollies

PRODUCT OVERVIEW

This low profile manual trolley has been designed to quickly install on virtually any S, H, and W type I-beam. The width of the trolley is adjusted by rotating the center rod with lifting eye clockwise or counterclockwise. Once the hoist (not included) is attached, the center rod cannot be rotated which prevents the trolley width from accidentally changing. This push trolley includes four (4) rollers with sealed bearings for long life. A lifting eye is located at the bottom of the trolley for attaching a hoist (not included). The trolley features steel construction and a painted finish.

KEY FEATURES

- Fits tapered (S & I beams) and Flat-Flanged Beams (W-Beams)
- Turning center screw with eye easily adjusts trolley width
- Solid steel construction provides long lasting rugged use
- Sealed bearings provide long life
